About Me

I studied Fashion Design at Elizabeth Galloway, where I developed strong creative and technical skills in the industry. I am proficient in Adobe Illustrator, InDesign, and Photoshop, and I have hands-on experience in pattern drafting, garment construction, and sewing.

I bring a balance of creativity, professionalism, and teamwork to my work. With a strong work ethic, a friendly personality, and a passion for innovative design, I thrive in collaborative environments and enjoy bringing ideas to life through thoughtful, well-crafted fashion.

3RD YEAR RANGE

FASHION DESIGN

During my studies, I gained a deep understanding of the fashion industry — from its history and cultural influences to its business operations and practical processes. This knowledge has given me a strong foundation to approach design with both creativity and industry awareness.

PHOTOSHOP,ILLUSTRATOR & INDESIGN

I am skilled in using Adobe Illustrator, InDesign, and Photoshop to create a wide range of design materials. My abilities include developing technical drawings, producing fashion illustrations, designing moodboards, and creating professional booklets and visual presentations.

GARMENT CONSTRUCTION

In production, I developed skills in pattern drafting, working with a variety of fabrics, and constructing complete garments. This hands-on experience has strengthened both my technical ability and my understanding of how design translates into finished products.

BRANDING FOR MY COLLECTION

This is my 3rd year, self expression range

PHOTOGRAPHY

Over the course of my three years of study, I also gained experience in planning and executing photoshoots. This included managing every aspect of the process—selecting locations, directing poses, working with models, coordinating makeup, and bringing all the creative elements together to produce a cohesive final shoot.
